Point Washington State Forest

CHECKLIST OF BIRDS

Woodstork

Welcome to to the many coastal communities of South Walton County. The forest contains some excellent examples of sandhill and old growth longleaf pine as well as various wetland ecosystems that attract a wide range of bird species. Bachman’s sparrows are very likely to be heard during the spring in areas of wiregrass and palmetto in the southern portion of the 3-mile loop of the Eastern Lake Trail. A variety of songbirds and red-shouldered hawks are commonly spotted where the 5 and 10-mile Eastern Lake Trail sections cross the western arm of Peach Creek. In the flatwoods area you can find an abundance of cooper’s hawks, eastern towhees and common yellowthroats.

Summer Tanager

SEASONS

These categories indicate the general periods in which to expect the various species.

Spring	(Sp)	March	April	May
Summer	(Su)	June	July	August
Fall	(F)	September	October	November
Winter	(W)	December	January	February

CATEGORIES OF ABUNDANCE

These designations apply to the relative abundance of species seen (or heard) in the appropriate habitat.

- C - common: usually present in large numbers-likely to be seen
- O - occasional: seen only a few times during a season
- U - uncommon: usually present in small numbers, not certain to be seen or heard
- R - rare: not to be expected
