Dear Mr. Lee:

A recent nematode sampling of your nursery described below has been processed and found to be negative for burrowing, reniform and guava root-knot nematodes.

**Block - 151380 consisting of 2.0 acres located at 901 4th Street NW, Ruskin
(HILLSBOROUGH COUNTY)**

Your plant material on attached certification list and grown per California requirements, at the locations described above, meet the **(TYPE III)** nematode certification requirements for **all states**.

This is official notice that the number **0980** is your permanent nematode certification number.

Nurseries which have signed a **QC-390 compliance agreement** must have pre-numbered waybills for California shipments and must have plants listed exactly as the plants appear in this letter. Each package shipped via mail must include a statement on the package "**OK for parcel inspection**".

Nurseries that are not under a compliance agreement must have their shipments to California accompanied by a **Florida Phytosanitary Certificate**. The state of Arizona requires a **State Phytosanitary Certificate** to accompany all shipments.

To remain approved, all plants, plant parts (except seed), soil, sawdust, mulch, manure, or peat used in this area of your nursery must be burrowing, reniform and guava root-knot nematode certified and accompanied by a certificate.

Nurserymen are reminded that the nematode certification covering the plant material on attached certification list shall remain in effect for a period of 1 year (12 months) and expires **September 24, 2022**, unless revoked for cause.

Your official nematode certification list, can be found on our department website through the following link:
www.fdacs.gov/NematodeCertification

If you have questions regarding your certification please contact your local inspector, Tracy Howard at (941) 981-6101, or email: tracy.howard@fdacs.gov.

Sincerely,

Jason D. Stanley
Assistant Chief - Plant Inspection
Bureau of Plant & Apiary Inspection
